**V.A.C.ULTA™ Negative Pressure Wound Therapy Unit with V.A.C.® Therapy**

**Setting up the Therapy Unit**

1. **Attach the canister**
   - V.A.C.® Therapy: 500ml or 1000ml canister (Acute Care only)

2. **Connect the Dressing Tubing** (after applying the dressing)
   - Align, Push, and Twist

**Enhanced Features**

- **SEAL CHECK™ Leak Detector**
- **DYNAMIC PRESSURE CONTROL™**

**Initiating V.A.C.® Therapy**

- Press and hold power button until light comes on.
- Select V.A.C.® Therapy
- Configure V.A.C.® Therapy as prescribed; Choose Continuous (default) setting and select OK.
- Confirm Settings screen
- Select OK to accept settings.

**Contraindications**

- Do not place foam dressings of the V.A.C.ULTA™ Therapy System (including both V.A.C.® Therapy and V.A.C. VERAFLLO™ Therapy Dressings) directly in contact with exposed blood vessels, anastomotic sites, organs, or nerves.

- V.A.C.® Therapy is contraindicated for patients with:
  - Malignancy in the wound
  - Untreated osteomyelitis
  - Non-enteric and unexplored fistulas
  - Necrotic tissue with eschar present (NOTE: After debridement of necrotic tissue and complete removal of eschar, V.A.C.® Therapy may be used.)
  - Sensitivity to silver (V.A.C.® GRANUFOAM SILVER™ Dressing only)

**NOTE:** Refer to the Instructions for Use for complete details regarding Dressing Application.
